

EDUCATION

Iowa State University <i>Bachelor of Science in Computer Science, Minor in Cyber Security, GPA: 3.56/4.0</i>	May 2026 <i>Ames, IA</i>
--	------------------------------------

EXPERIENCE

IT Application Development Intern <i>Magnetar Capital LLC</i> - Developed and deployed Nuget library with over 260 installs across various repositories. - Developed and maintained internal reporting tools in C, including enhancements to MIR, a proprietary back-office application using the .NET framework. - Diagnosed and resolved a production-critical bug impacting live financial reporting, restoring full functionality within thirty minutes. - Collaborated with IT colleagues to troubleshoot and optimize performance in production systems, improving startup times by up to 25%.	May 2025 - Aug 2025 <i>Evanston, IL</i>
LAS IT Student Systems Specialist <i>Iowa State University Math Department</i> - Provided Tier-1/Tier-2 technical support to faculty, staff, and students, resolving hardware, software, and network issues with over 90% satisfaction rate. - Managed equipment rentals and tracked inventory to ensure availability and accountability. - Utilized ServiceNow to log, prioritize, and track support tickets through resolution.	Nov 2023 - May 2026 <i>Ames, IA</i>

PROJECTS

AI-Driven Stock Market Simulation Platform <i>In Progress</i> <i>C#, SQL, React.js, Python, LLMs</i> - Developed a full-stack web platform that simulates stock and crypto trading using historical and live market data, enabling users to execute and track virtual trades without real capital risk. - Integrated an AI assistant powered by open-source large language models to summarize market conditions, explain trading concepts, and suggest simulated trading actions for educational purposes. - Designed and implemented a data ingestion and preprocessing pipeline to continuously feed market data into LLM workflows, improving contextual accuracy and response relevance over time.
Habit Tracker WebApp <i>(In Progress)</i> <i>React.js, Express, Node.js</i> - Developed a full-stack habit-tracking platform using React and Express.js, implementing a modular Controller-Service-Repository architecture to ensure clear separation of concerns and high maintainability. - Engineered a custom RESTful API to manage complex data relationships, enabling seamless CRUD operations for user habits with optimized data retrieval. - Designed and implemented a unified data schema to track habit consistency, streaks, and completion history, ensuring data persistence across sessions.
Uni Trade: Campus Marketplace <i>Full-stack Application</i> <i>Java, MySQL, Spring Boot</i> - Led backend development using Spring Boot, Java, and MySQL, optimizing database queries for a 30% boost in application performance. - Integrated real-time chat and notifications via WebSockets, enabling seamless user-to-user interactions. - Configured Maven for streamlined dependency management, reducing build issues and improving CI/CD deployment speed.

SKILLS

Languages: C#, Java, Python, SQL/MySQL, C/C++, JavaScript, HTML/CSS Frameworks: .NET, Spring Boot, React.js, Node.js, Express Tools: CI/CD, Nuget, Docker, Git/Github, Visual Studio

LEADERSHIP

Standards Board, Academic Review Board - Delta Upsilon Fraternity @ Iowa State University
